DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The instantly claimed sulfated bimodal Guerbet compositions and processes for their use in the production of emulsions is neither disclosed nor fairly suggested by the closest prior art: O'Lenick et al (Journal of the American Oil Chemist's Society, Effects of Branching upon Some Surfactant Properties of sulfated Alcohols, 73(7), pages 935-937). O'Lenick teaches (Page 937, column 1, top, Table 1) the surfactant properties of the sulfates derived from alkoxylated linear and Guerbet C₁₆ alcohols and the formation of emulsions therewith. O'Lenick, however, neither discloses nor fairly suggests the formation compositions comprising both linear and Guerbet alcohol – derived sulfates or methods for their use. The instantly claimed compositions and methods are therefore patentable over the teachings of O'Lenick, the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by

37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony J. O'Lenick on July 14, 2006.
